

# RESIDENTIAL

## Drinking Water System

- Sedimentation, dust & rust
- Odor less & all organic pollutants
- TFC R.O membrane
- Sterilization & control of microbiological contamination
- 6 Stages mineral water

## Filtration System

- Remove particles & Pollutants, Like sediments & undissolved suspended solid
- Remove contaminants, impurities, chlorine & bad taste through carbon adsorption

## Sterilization System

- Produce disinfected water
- Environment friendly
- Cost effective
- Less maintenance
- Sterilization & control of microbiological contamination

Product Portfolio

*Your Reliable Partner  
in Water Treatment Solution*

Corporation

Science and service for better health

## HEALTH CARE

### Dialysis R.O

- New Innovative technology
- User friendly
- Compact design
- Ideal for prospect necessity
- TFC ON-Line membrane

### Lab RO

- Remove particles & Pollutants
- Sterilization & control of microbiological contamination
- Environment friendly
- Cost effective
- TFC ON-Line membrane

### CSSD (Central Sterile Supply Department)

- Remove hardness
- Prevent scaling in boiler geysers
- Prevent scaling & corrosion in pipelines
- TFC membrane

## COMMERCIAL

### Drinking Water System

- Sedimentation, dust & rust
- Odor less & all organic pollutants
- TFC R.O membrane
- Sterilization & control of microbiological contamination
- 6 Stages mineral water

### Softening Plant

- Remove hardness
- Prevent scaling in boiler geysers
- Prevent scaling & corrosion in pipelines
- Saving of detergent soap washing

### Industrial RO

- Food & beverage
- Hotel & Restaurant
- Textile industry
- Pharmaceutical industry
